Voices: Someone who...	Who is speaking on IC for drug use or those who are affected by IC for drug use?	
	Uses/had used	Describes experiences or input on IC from someone who uses or has used drugs.
	Friend/relative/community member	Describes experiences or input on IC from a friend, family member, or community member.
	Legislator	...from a legislator or policymaker (politicians, lawmakers, people holding political office)
	HC professional/Expert opinion	...from a licensed healthcare professional/practitioner, or other expert on drugs, drug policy, healthcare, public health, etc. (doctors, nurses, psychologists, public health professionals)
	Journalist	...from a journalist (article author's own perspective or another journalist's view)
	Law enforcement	...from law enforcement entities (sheriff, police departments, prison/jail staff, etc.)
	HC director/administrator	...from healthcare directors or administrators (facility directors, hospital administrators, etc.)
	Advocacy	...from advocates (either for or against IC or other public health measures/agencies, those advocating for any voices mentioned here such as law enforcement advocates, etc.)
	Legal entities	...from legal workers/entities (judges, lawyers, etc.)
	Other	Person speaking on IC has a role outside of the above labels. Please make a note of their title/role in the Notes column.
Context: Reporting on...		
	Person/Case	Reports on a specific person's experience with involuntary commitment for substance use

	Policy Change	Reports on any policy change, recommendation, or proposal related to involuntary commitment for substance use.
	IC as a Practice	Reports on involuntary commitment as a practice or concept.
COVID		
	Safety concerns	Article covers safety concerns related to committing people (proximity = risk of transmission, PPE availability, etc.) during COVID pandemic.
	Efforts to keep committing	Article covers efforts to continue practice of involuntary commitment despite risks related to COVID.
Recommended Alternative to Incarceration?		
	Yes, recommend	Article endorses IC as an alternative to incarcerating for drug use.
	Neutral	Article presents EITHER: no judgment OR both sides of the debate regarding IC as an alternative to incarcerating for drug use.
	Not recommended	Article is opposed to IC as an alternative to incarcerating for drug use.
	No mention	Article does not mention/make recommendations on IC in relation to incarceration.
Inpatient/Outpatient		
	Inpatient	Article speaks on involuntary commitment as: 1) a practice where patients are subjected to a mandated stay of any kind (ex. "patients are held for 72 hours...") OR mentions a facility where patients are held; or 2) explicitly refers to the practice as inpatient.
	Outpatient	Article speaks on mandatory treatment as an out-patient practice
	No mention	Article does not specify whether in or outpatient
	Both	Article mentions both in-patient and outpatient treatment
Themes		
	Critical	Article is critical of IC as an ethical practice (can present opposing arguments but generally is critical)
	Neutral	Article is neutral or equally presents both sides of the debate over IC.
	Supportive of IC	Article is supportive of IC or endorses it as a practice. Fails to ask any critical or ethical questions.
	Supportive of Harsher Punishment	Article is supportive of or recommends alternative practices that are harsher than IC (incarceration, longer mandatory commitment periods than are currently in place).
Drug Type		

	Opioids	
	Alcohol	
	Stimulants	
	Benzodiazepines	
	Cannabis	
	Synthetic Cannabis	
	Psychedelics	
	Polysubstance Use	Article specifically mentions concurrent polysubstance use as the trigger for IC.
	Unspecified Drugs	Article mentions "drugs" or "drug use" as the substance use required to trigger IC, but does not further specify the type(s) of drugs.
	Not Specified	Article does not specify the type of substance use required to trigger IC.
